Weekly Individual Report Unit 4 Week 12

Austin Hall

UFID: 90207943

Time Dedicated to the Project

I spent about 15 hours on the project this week. I plan to spend another 3-5 hours on the project over the weekend.

Contribution to Project Development Process

This week I spent most of my time working on creating, storing, retrieving, and displaying thumbnails for each video in a given collage. This involves working with all aspects of the project, the front end, the back end, and the database system.

Demonstration of Applied Knowledge

This week's research and knowledge involved better understanding every aspect of the project. I had to deal with retrieving a video from the database, creating a thumbnail from the first frame, attaching the thumbnail to the video id, then storing it in the database. I then have to retrieve those thumbnails and add them to the video strip below the main video player.

Reflection

This task has proved to be more difficult than I expected. The thumbnail for the first video displays correctly, but I am having an issue getting all the thumbnails to display. The project still runs and works, which is good, but I will be debugging this issue over the weekend.
